CIMdata Defining What Comes Next in Digital Transformation

Strategic management consulting for competitive advantage in global markets

The leading independent authority on PLM and its digital transformation. We provide research, education, and strategic consulting to clients around the world.

OUR MISSION:
Maximizing clients' ability to design, acquire, deliver, and support innovative products and services.

State of PLM: Today's Market & Leading Trends

2024 Market & Industry Forum—27 March 2024

Key Takeaways

State of PLM: Today's Market & Leading Trends

- CIMdata continues to expand & adjust to major PLM market trends
- CIMdata's global A&D PLM Action Group has entered its 10th year in partnership with market leaders—major research continues
- Multiple disconnects still exist, e.g., prioritization of digital initiatives, and management's narrow understanding of lifecycle management
- The global PLM Economy is growing and continues to add value
- To be successful, companies need to transform people, processes, and technologies—there are at least 12 evolving critical elements
- The next industrial revolution is already upon us

Chief Revenue Office Role Added

 *Alan Mendel rejoins CIMdata after a lengthy leave of absent*

Thursday, August 17, 2023
PLM Industry Veteran, Alan Mendel, Joins CIMdata as Chief Revenue Officer

Ann Arbor, Michigan, USA 17 August 2023—CIMdata, Inc., the leading global Product Lifecycle Management (PLM) strategic management consulting and research firm, announces the appointment of Alan Mendel as its Chief Revenue Officer reporting to President & CEO, Peter Bilello.

Over his 36-year career, Alan has served in various management roles at Aras Corporation, LeverX, CIMdata, Schlumberger CAD/CAM, Groupe Bull, and Adra Systems. He's developed and implemented world-class PLM/CAD/CAM software, consulted and assisted international organizations to establish PLM and digital transformation initiatives, select solutions and service providers, and has driven business benefits generating global PLM deployments.

CIMdata's New Director of Research

Christine joins CIMdata and takes over main MAR responsibilities

Friday, March 01, 2024

CIMdata Announces the Promotion of Christine Longwell to Director of Research

ANN ARBOR, Michigan, USA 1 March 2024—CIMdata, Inc., the leading global research, consulting, and education firm specializing in Product Lifecycle Management (PLM) and the Digital Transformation it enables, is pleased to announce the promotion of [Christine Longwell](#) to Director of Research.

In this role, Christine will assume primary responsibility for CIMdata's core market analysis activities, including data gathering, analysis, and reporting. With her experience as a design and manufacturing engineer and proven track record in research and analysis, she is well-positioned to lead CIMdata's research efforts and drive continued excellence in delivering valuable insights to our clients.

CIMdata's Vice President, Stan Przybylinski, will transition to lead CIMdata's overall research agenda. Additionally, he will provide essential support for CIMdata's broader market research initiatives and consulting projects. Stan will continue in his role as the Vice President of CIMdata.

Stan Przybylinski, CIMdata's Vice President, has transitioned to lead CIMdata's overall research agenda. Additionally, he will provide essential support for CIMdata's broader market research initiatives and consulting projects.

AD PAG 2024 Research Agenda

The Aerospace & Defense PLM Action Group was founded in February 2014

Mission

An association of aerospace & defense companies within CIMdata's globally recognized PLM Community Program, which functions as a **PLM advocacy group** to:

- Set the direction for the aerospace & defense industry on PLM-related topics that matter to members
- Promote common industry PLM processes and practices
- Define requirements for common interest PLM-related capabilities
- Communicate with a unified voice to PLM solution providers
- Sponsor collaborative PLM research on member-prioritized industry and technology topics

Members

Defining PLM

 Digital transformation of the lifecycle, enabled by the product innovation platform

PLM is...

- A strategic business approach powered by a consistent set of solutions
- Enabled by product innovation platforms that support the extended enterprise
- An approach that spans the full lifecycle, from idea through life
- Enables a set of evolving functional domains orchestrated by an extended enterprise-level "systems of systems" approach

CIMdata

CIMdata's PLM Status & Trends Survey

 Some key conclusions—7th year of CIMdata's PLM Status & Trends global survey

- This year's respondents represent a wide & diverse community
- Most implementations still focus on "traditional" PDM aspects of PLM
- For the most part, companies continue to find PLM worth investing in
- Configurability has become a bigger issue for many
- There continues to be an emphasis on getting faster, better, cheaper
- Enterprise digital priorities & systems confusion still exists
- Management disconnect appears to be widespread
- PLM appears to have continued its positive momentum

What CIMdata Has Been Saying

Some examples—have you seen what we have been publishing since the last year?

PLM Stays Relevant in Manufacturing Trends

Experts weigh in on how PLM

By Randall Newton
October 12, 2023

In 1985, American Motors Corporation became the first carmaker in America to make an integrated design and engineering information system called relational database management. The automated recordkeeping included using another new technology called PLM. It was noted in the production cycle for a new product in automobile manufacturing.

Mark Reisig · 1st
Executive Consultant and Sustainability

innovations in engineering and digital thread and extended reality. How are these technologies being adopted? How are they being used to improve workflows?

From the beginning included the value of having that data from idea through life. Digital collaboration around evolving in the same place. It is just that the value of these things more practical. So

ins and the digital thread are integrated concepts in that the digital thread (all have) data that can animate these insights to support collaboration across more than the engineering disciplines. I had for a while that while everyone is talking about digital twins, those twins are fraternal twins, with very different meanings depending on the solution or service provider. In the definition of PLM, disciplinary lifecycle optimization is at the heart of digital twins of different aspects of your

State of PLM: Today's Market & Leading Trends

2024 Market & Industry Forum—27 March 2024

2023 PLM Market – Overall State

 PLM market—overall growth of 8.6%

- The global PLM market missed CIMdata's forecast*
 - Overall, the PLM market was up **8.6%** to **\$73 billion** (vs. forecast of 10.1%)
 - cPDM sector @ \$23.8B(7.0%); solid software and services growth
 - Tools sector @ \$48.3B (9.4%); led by significant EDA & S&A growth
 - Digital Manufacturing sector @ \$968M (6%)
- Bright spot for partners:
 - Integration of Low Code/No code solutions (e.g., Mendix, ThingWorx & Aras) enables companies to increase the flexibility of their solutions (win/win for customers & SIs)
- Digital Transformation driving PLM investments
 - Led by major service providers, e.g., Accenture & Atos, expanding their reach
 - EDA and S&A are outpacing the market as companies look to better anticipate life of a product
 - AEC is performing well as BIM usage is becoming widespread across projects of all sizes

49 *MCAD grew at a slower rate than forecasted Copyright © 2024

The Ultimate Vision

 Many credit Vickers as the first person to use the phrase—"digital twin"

06 Digital thread/twin

"The ultimate vision for the digital twin is to create, test and build our equipment in a virtual environment. Only when we get it to where it performs to our requirements do we physically manufacture it."

We then want that physical build to tie back to its digital twin through sensors so that the digital twin contains all the information that we could have by inspecting the physical build."

John Vickers, Manager,
NASA's National Center for
Advanced Manufacturing

56 <https://www.forbes.com/sites/bernardmarr/2017/03/08/whats-digital-twin-technology-and-why-is-it-so-important/?sh=783735a22e2a>

Some Definitions

 What is artificial intelligence, machine learning, and deep learning?

- **Artificial Intelligence (AI)** is the ability of a machine to perform tasks that normally require human intelligence, such as visual perception, speech recognition, decision-making, and translation between languages
- **Machine Learning (ML)** is making predictions and recommendations by algorithmically detecting patterns in available data and information, and improving the algorithms over time with new data and information, without explicit programmed instructions
- **Deep Learning (DL)** is a type of machine learning in which a cascade of interconnected layers of processing units extract increasingly complex features from the output of previous layers, leading to a hierarchy of concepts that can help make determinations about new data

AI ML DL

58

Copyright © 2024

State of PLM: Today's Market & Leading Trends

2024 Market & Industry Forum—27 March 2024

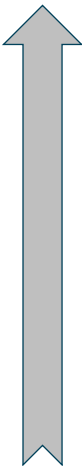

Augmented Intelligence

 *This is where we are at*

- **Augmented Intelligence** or intelligence augmentation (IA) is not about replacing human intelligence but rather about amplifying or augmenting it by enabling humans to make use of the large volume of data we're generating by combining human and machine intelligence

"Over the next decade, AI won't replace managers, but managers who use AI will replace those who don't."

Erik Brynjolfsson and Andrew McAfee, HBR (2017)

Artificial

Augmented

Human
Copyright © 2024

Generative AI

 *The AI revolution is upon us*

- Deep-learning models that can generate high-quality text, images, and other content based on the data they were trained on
- AI has gone through many cycles of hype, but even to skeptics, the release of ChatGPT seems to mark a turning point
- OpenAI's chatbot, powered by its latest **large language model** (LLM), can write poems, tell jokes, and churn out essays that look like a human created them
- Prompt ChatGPT with a few words, and out comes love poems in the form of Yelp reviews, or song lyrics in the style of Nick Cave

60 Source: <https://research.ibm.com/blog/what-is-generative-AI>

CIMdata10
Augmented intelligence

Large Language Models

Defining LLM

- A specialized type of AI that has been trained on vast amounts of data to understand existing content & generate original content
- A type of AI program that can recognize and generate text, among other tasks
- They are trained on huge sets of data
- They are built on ML: specifically, a type of neural network called a transformer model
- A computer program that has been fed enough examples to be able to recognize and interpret human language

61 Source: <https://www.cloudflare.com/learning/ai/what-is-large-language-model/>Copyright © 2024

CIMdata10
Augmented intelligence

What Is RAG?

Retrieval-Augmented Generation (RAG)—a simplified definition

- A technique for enhancing the accuracy & reliability of GenAI models with facts retrieved from external sources
- RAG fills a gap in how LLMs work
 - LLMs are neural networks, typically measured by the number of parameters
 - An LLM's parameters essentially represent the general patterns of how humans use words to form sentences
- Deep understanding, sometimes called parameterized knowledge, makes LLMs useful in quickly responding to general prompts
 - Does not serve users who need a deeper dive into a current/more specific topic

62 Source: <https://blogs.nvidia.com/blog/what-is-retrieval-augmented-generation/>Copyright © 2024

State of PLM: Today's Market & Leading Trends

2024 Market & Industry Forum—27 March 2024

RAG's Importance

Setting the appropriate context

- When a LLM doesn't have enough information or has no contextual knowledge of a topic, it is more likely to hallucinate, and provide inaccurate or false responses
- AI researchers and developers have been exploring numerous RAG technologies, including:
 - Text chunking, query expansion, hybrid search, knowledge graph, reranking, and others
- An LLM needs the right data so that it doesn't have to make things up, and you need the best search technology to find the right data

63 Source: <https://cloud.google.com/blog/products/ai-machine-learning/rags-powered-by-google-search-technology-part-1> Copyright © 2024

How People Are Using RAG

The application of RAG has just begun

- With RAG, users can essentially have conversations with data repositories, opening new kinds of experiences
 - This means the applications for RAG could be multiple times the number of available datasets, for example,
 - A generative AI model supplemented with a medical index could be a great assistant for a doctor or nurse
 - Financial analysts would benefit from an assistant linked to market data
 - Manufacturing professionals' knowledgebase would expand significantly as an enterprise's search engine spans the organization's systems & data repositories*
- Almost any business can turn its technical or policy manuals, videos or logs into resources called knowledgebases that can enhance LLMs

64 Source: <https://blogs.nvidia.com/blog/what-is-retrieval-augmented-generation/> Source: *CIMdata Copyright © 2024

How RAG Impacts Enterprise Search

Maximizing ROI: How RAG Impacts Enterprise Search Strategies—from Sinequa

10
Augmented intelligence

- RAG is leading the way in revolutionizing enterprise search
- RAG's combination of information retrieval & NL generation not only improves search relevance and precision but also...
 - It optimizes information resources, empowers decision-making, enhances business intelligence, and yields a significant ROI
- As organizations continue to use RAG, they will pave the way for a future where information retrieval goes beyond traditional boundaries, driving businesses towards greater efficiency & innovation

State of PLM: Today's Market & Leading Trends

2024 Market & Industry Forum—27 March 2024

What CEO's Are Saying

CEOs are facing a unique set of challenges and opportunities in 2024. McKinsey has identified **eight key priorities for CEOs** this year.

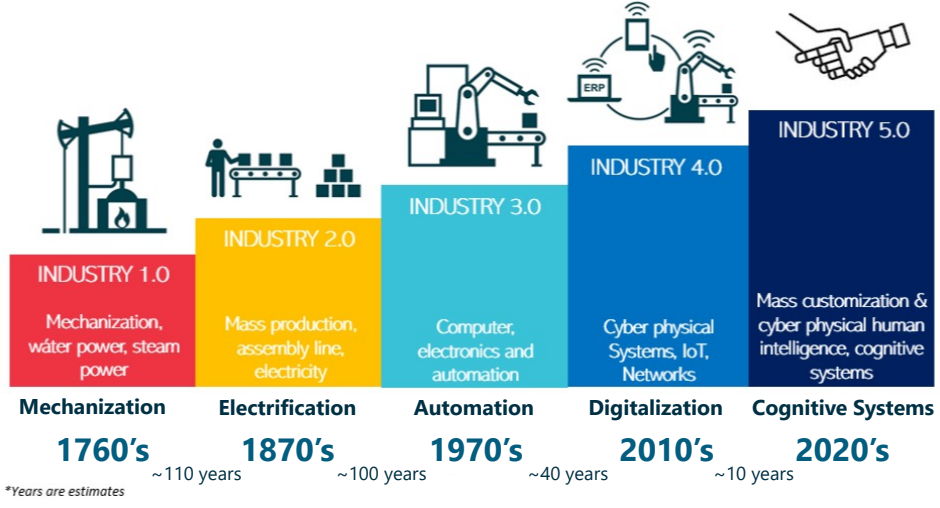

These include:

- 1 Leveraging generative AI across business operations and scaling its applications
- 2 Outcompeting with technology by fundamentally rewiring organizations to extract maximum value from digital transformations
- 3 Navigating the energy transition, which represents a significant capital reallocation
- 4 Identifying and leveraging organizations' unique strengths
- 5 Appreciating the critical role of middle management
- 6 Ensuring resilience against geopolitical disruptions
- 7 Driving continuous growth
- 8 Navigating the complexities of a fluctuating macroeconomy

Industry 6.0...What's Next?

“

The measure of intelligence is the ability to change.

ALBERT EINSTEIN

GRACIOUSQUOTES.COM

“

There is nothing permanent except change.

HERACLITUS

GRACIOUSQUOTES.COM

“

The secret of change is to focus all of your energy not on fighting the old, but on building the new.

SOCRATES

GRACIOUSQUOTES.COM

Given the rate of change we have seen, Industry 6.0 is probably already upon us.

State of PLM: Today's Market & Leading Trends

2024 Market & Industry Forum—27 March 2024

CIMdata

This Year's Market & Industry Forum Theme

 *Digital Twins: Enhancing Lifecycle Performance*

- Digital twins are everywhere today
 - Virtually all the top 25 PLM market leaders globally are talking about and supporting the concept
- While not everyone agrees on exactly what a digital twin is, the need to better understand a product's lifecycle performance on a range of metrics is critical to optimizing its performance
- In this Forum, CIMdata will
 - Highlight the overall issue
 - Discuss how the global PLM Economy is responding
 - Discuss how well industrial companies appear to be achieving their objectives

State of PLM: Today's Market & Leading Trends

2024 Market & Industry Forum—27 March 2024

CIMdata

Concluding Remarks

State of PLM: Today's Market & Leading Trends (1 of 2)

- CIMdata continues to expand & adjust to major PLM market trends—adding people & services to stay at the forefront
- CIMdata's global A&D PLM Action Group has entered its 10th year in partnership with market leaders—major MBSE research is underway & you can participate
- Multiple disconnects still exist, e.g., prioritization of digital initiatives, and management's narrow understanding of lifecycle management—executive education still required
- The global PLM economy is growing and continues to add value

77Copyright © 2024

CIMdata

Concluding Remarks

State of PLM: Today's Market & Leading Trends (2 of 2)

- The global PLM economy has reached another milestone—***\$73 billion—a 8.6% increase***
- To be successful, companies need to transform people, processes and technologies—there are at least 12 evolving critical elements—the convergence of digital thread/digital twin & continued emergence of multiple forms & application of AI
- The next industrial revolution is already upon us—are you ready?

Agility is key to long-term success...is your organization agile?
